

Индивидуальный проект. Этап №4

Добавление к сайту данных о себе.

Мишина А. А.

24 апреля 2023

- Мишина Анастасия Алексеевна
- Группа НПИбд-02-22

- Добавить к сайту данные о собственных ресурсах и сделать несколько постов.

- Разместить ссылки на собственные ресурсы.
 - Сделать пост по прошедшей неделе.
 - Добавить пост на тему по выбору:
1. Оформление отчёта.
 2. Создание презентаций.
 3. Работа с библиографией.

Выполнение работы

Mishina Anastasiya

Frontend developer

Peoples' Friendship University of Russia

Mishina Anastasiya is a student at the People's Friendship University of Russia. Her interests include web-design, android applications development and learning about programming. She got Secondary general education in Bryansk Lyceum №2 (graduated 2022). She is studing the course of Applied Computer Science, where is learning programming in deferent spheres.

My week

Want to know more about me?

Mihnea Anastasiu

Apr 24, 2023 · 1 min read · About Me

Two weeks ago, I decided to spend the next week better than the previous one. And a week ago I promised that this week would be more colorful and productive...

But did I manage to keep my promise?

I **didn't waste any time** this week and I'm very happy with that. I studied a lot, did all the tasks and even had time to walk 20 km with my friends. But unfortunately, I fell ill this week.

Is it possible to call this week productive?

It seems to me that it is **very important** to find time for rest and communication, so this aspect is not only about working. I succeed.

39 It seems to me that it is very important to find time for rest and
  communication, so this aspect is not only about working. I succeed.
40
41 ## Will the next week more productive?
42
43 I'm not sure I can be more productive next week, however I should because of the
  amount of tasks I was given. So I'll try to do my best next week.

Make a report with me

What for? How? Is it that hard?

Mishina Anastasiya
Apr 24, 2023 · 2 min read · Education

Know more about making a report!

Every week we do laboratory work. Then we should prepare a report for our labs. We make reports for laboratory work in the lightweight markup language **markdown**.

What is MARKDOWN?

Markdown is a lightweight markup language for creating formatted text using a plain-text editor. John Gruber and Aaron Swartz created Markdown in 2004 as a markup language that is appealing to human readers in its source code form. Markdown is widely used in blogging, instant messaging, online collaborative software, documentation pages, and readme files.

```
35 ## What is MARKDOWN?
36
37 Markdown is a lightweight markup language for creating formatted text using a
38 plain-text editor. John Gruber and Aaron Swartz created Markdown in 2004 as a
39 markup language that is appealing to human readers in its source code form.
40 Markdown is widely used in blogging, instant messaging, online forums,
41 collaborative software, documentation pages, and readme files.
42
43 ## How do we execute the report?
44
45 For each laboratory work, we have a template that we need to fill in with all the
46 necessary information.
47
48 The title page of the report contains information about the number of the lab,
49 the topic and the author of the report. Next, we describe the purpose of the
50 laboratory work, the task, as well as a theoretical introduction.
51
52 And then the description of the main part of the work begins. Description of the
53 work.
54
55 We should describe the accomplishment of the work as fully and clearly as
56 possible.
57
58 To do this, we can divide the job description into several parts, insert
59 screenshots, etc.
60
61 ## What for?
62
63 Creating a report is an important stage of laboratory work, because it is
64 during the execution of the report that the material is consolidated and its full
65 awareness occurs.
